4 Adam will eat a cheeseburger and Dana will eat a tuna salad.

[23~24] Read the passage and answer the questions.

After leaving your stomach, food particles enter your small intestine.

This is a long tube. As the food particles move along through it, they are digested. After that, by the time the food reaches the end of the small intestine, you take most of its nutrients.

At this point, what's left of the food is mostly water and waste products.

This material then enters your large intestine. A large intestine is also a long tube. It removes water from the waste products.

23. Where are the food particles digested?

- 1 stomach
- 2 small intestine
- 3 large intestine
- 4 liver

24. What removes water from the waste products?

- 1 stomach
- 2 small intestine
- 3 large intestine
- 4 liver
